DETAILED ACTION

Election/Restrictions

1. Applicant's election without traverse of Species 1 in the reply filed on 7/22/05 is acknowledged.

Claim Rejections - 35 USC § 103

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 1-3 are rejected under 35 U.S.C. 103(a) as being unpatentable over Flower et al (2002/0185348) in view of Jankovsky (U. S. Patent no. 4,442,870).

Flower et al discloses:

See figures 1-4 casing, sliding (first moving member 34, second moving member 48 with damping portion 58A), conversion mechanism (inclined faces 54, 66)

Flower et al does not disclose a tapered damping groove. Jankovsky teaches the use of a tapered damping groove (see figure 6 surfaces 21-24,31-34) in order to increase brake surface area. It would have been obvious to one of ordinary skill in the art at the time the invention was made to use the tapered damping groove as taught by Jankovsky in the device of Flower et al in order to increase braking surface which increase the damping force available.
